

# NEW CONSTRUCTION

## CITY OF NORTON SHORES DEPARTMENT OF POWER & WORKS

The City of Norton Shores was looking for a turnkey comprehensive construction process that begins in the preconstruction/design phase and carries through to project completion. We were selected for the project due to our extensive commercial construction management experience and our reputation for completing projects in a timely manner and to the satisfaction of our clients.

### CHALLENGES

The challenge was to complete three projects in one: a facility to house the Public Works department staff and equipment, a full-service fueling station, and a cold storage/salt barn. Each project had specific code requirements and certifications.

### RESULTS

The results of meeting the everyday challenges of a large project, along with satisfying specific requirements and obtaining special certifications, was a seamless transition from an existing outdated and overcrowded building into a new, state-of-the-art facility.
