

# HACKLEY PUBLIC LIBRARY

## RENOVATIONS AND IMPROVEMENTS

Hackley Public Library

### CHALLENGES

Upgrading the heating, cooling, and electrical systems in the library while maintaining as much of the original detail of the building as possible.

Providing an entrance accessible to all.

### RESULTS

The fresh air combined with the new heating and cooling system should make the Library a much more comfortable place to come.

Much of the lighting throughout the library has been updated.

100 windows replaced, which combined with the new HVAC systems, will provide a considerably more efficient building.
